Northline data centre

1. Resolve the revision. Keep the child allocation open.

Switchgear has two competing finish assertions. Commissioning has a schedule record, without a supplied child cost allocation. Neither question can be resolved by upload order or inheritance.

N01.A.E.SG · Switchgear / finish assertions

Revision A

2026-08-21

Activity_Extract_RevA.csv
row 2

Proposed revision B

2026-09-04

Switchgear_Dates_Proposed_RevB.csv
row 2

Applicability unresolved. Proposed B is not an approved delay.

Cost and package values have different source bases; no established variance.

Parent electrical allowance
N-C01 · CAD 1,800,000
Unapproved; review required

Included switchgear allowance
N-C02 · CAD 420,000
Included in N-C01; not additive

N01.A.E.CX · Commissioning: N-S02 supplies dates. No child cost allocation is supplied. N-C01 and N-P01 remain parent-only context, not commissioning value allocations.

One switchboard. Two finish dates.

Revision A states 21 August 2026; proposed revision B states 4 September 2026. Applicability remains unresolved. This is not an approved delay.

Requested professional review

Confirm the applicable N-S01 schedule revision through professional review and separate schedule approval; preserve both source assertions.

Commissioning has dates, but no cost allocation.

The parent electrical allowance is not an independently allocated commissioning amount. Missing cost evidence is not zero cost.

Requested professional review

Obtain the commissioning cost allocation and confirm its basis before attributing any parent electrical amount to this scope.

2. Questions for professional review

One switchboard. Two finish dates.

N01.A.E.SG	Requested professional review
Revision A states 21 August 2026; proposed revision B states 4 September 2026. Applicability remains unresolved. This is not an approved delay.	Confirm the applicable N-S01 schedule revision through professional review and separate schedule approval; preserve both source assertions.

Activity_Extract_RevA.csv, row 2; Switchgear_Dates_Proposed_RevB.csv, row 2; Review_and_Allocation_Notice.docx, paragraph 3.

Commissioning has dates, but no cost allocation.

N01.A.E.CX	Requested professional review
The parent electrical allowance is not an independently allocated commissioning amount. Missing cost evidence is not zero cost.	Obtain the commissioning cost allocation and confirm its basis before attributing any parent electrical amount to this scope.

Activity_Extract_RevA.csv, row 3; Budget_Allowances.csv, row 2; Review_and_Allocation_Notice.docx, paragraph 4.

Supply and installation have different boundaries.

N01.A.E	Requested professional review
N-P01 is parent-level installation, including commissioning. N-P02 is switchboard supply only. Neither supplies a child installation value.	Confirm package inclusions and exclusions before assigning installation scope or value to a child WBS element.

Trade_Package_Register.csv, rows 2–3; Review_and_Allocation_Notice.docx, paragraph 5.

3. Questions for professional review

Confirm what the parent allowance represents.

N01.A.E

The source assigns N-C01 to Electrical, but the deterministic evidence check flags allowance wording for professional review. The source amount remains an unapproved parent assertion.

Requested professional review

Confirm the scope and financial basis of N-C01 before treating the parent allowance as an applicable management amount.

Budget_Allowances.csv, row 2; Review_and_Allocation_Notice.docx, paragraph 4.

A proposed connection still needs a professional decision.

Project-wide

The fictional sources support proposals, not professional acceptance, whole-version approval or payment entitlement.

Requested professional review

Review source applicability and proposed connections; record professional decisions separately from mapping approval and payment certification.

Review_and_Allocation_Notice.docx, paragraph 6.

4. Locate the original evidence

Original source	Source type	Located evidence
Activity_Extract_RevA.csv	schedule	3 source blocks
Budget_Allowances.csv	cost	2 source blocks
Owner_Scope_Register.csv	Owner WBS	6 source blocks
Review_and_Allocation_Notice.docx	review note	6 source blocks
Switchgear_Dates_Proposed_RevB.csv	schedule	1 source block
Trade_Package_Register.csv	package	2 source blocks

Use the workbook Crosswalk, Findings and Sources sheets to follow each recorded assertion, revision, proposed target and original-file fingerprint. Original files are supplied beside this report.

Source assertions, engine proposals, professional decisions and separate approvals remain distinct. No professional decisions or approvals recorded.

Prepared fictional demonstration using explicit source-code readings. No professional decisions, whole-version approvals, payment certifications, project-health results or aggregate financial position are created.
